WORK EXPERIENCE

Mittal Software Labs

Sept 2024 - Feb 2025

Associate Software Developer Intern

- Developed and maintained web applications.
- Built and optimized backend services and APIs.
- Managed databases, ensuring data integrity and security.
- Collaborated with cross-functional teams to gather requirements and implement features.
- Conducted code reviews, debugged issues, and performed testing.

PROJECTS

1. Slack Clone

A real-time messaging app built with *Next.js* and *ConvexAuth*, *ConvexDB*, featuring *secure auth (credentials & OAuth)*, multi-workspace support, channel-based chats, and personal messaging. Designed for seamless collaboration with dynamic backend integration.

2. Institute Management System (IMS)

Developed a Institute Management System with role-based access for admin, branch manager, teacher, and student. Included features like attendance, fees, exams, user management, resources management and communication to streamline institute operations efficiently. *ReactJS, MUI, Tailwind CSS, Manual Auth, NodeJS, ExpressJS, MySql, DBeaver*

3. Pizza Ordering Website

A Pizza ordering website titled Fast Pizza offering features like creating order, viewing order information, cart related operations and many more using *React, Redux, React Router, Tailwind*

4. Vaartalaap

A responsive real-time chatting app called "Vaartalaap" built using *ReactJS, Material UI, NodeJs, ExpressJS, MongoDB and Socket.io*. The application enables one-on-one conversations for seamless direct messaging.

OTHER EXPERIENCE

- TechHack 1.0 Hackathon – Selected among Top 12 of 30 teams
- Web Development Training - AcmeGrade
